I like the lab idea but need to find something better than NDG labs. Did not like NDG labs because it wasn't very interactive and could not tell what percentage I completed labs.
Looks fine
None
The Penetration Testing book is very outdated and relies on being able to obtain Windows XP and Windows 7 licenses if you intend to try the labs yourself. Neither can easily be obtained. It would benefit students to switch to a more recent book.
I feel like the Kali Exercises were not very helpful. The difference in "hand holding" from the NDG labs and then the lack of instruction for the Kali Exercises felt like a huge jump. My team and I struggled on those the most and felt the most frustration in doing those because there weren't places we could go for help on completing them.

What helped you learn in this course? Business Cybercrime Management

Comments
Was expecting more crime related experience and types of uses for all the tools in Kali Linux. The Kali labs did not meet the level of cybercrimes that I expected in the course.
Class resources and outside resources
The YouTube videos were very helpful.
The labs provided a working environment to learn the course content and reinforce the CEH course book content.
I found that the NDG labs, although it felt like there were a lot, were very helpful in making me feel like I was grasping the information. I enjoyed completing those labs and felt a sense of accomplishment when I got to the end successfully and could answer all the questions.
